Bird Vane Bingo Call Outs

South	East	West	South
South	East	West	East
East	Southeast	Southeast	Southeast
Southeast	Southeast	Southwest	Southwest

The cardinal directions on the card indicate where the wind is blowing from, which is opposite of the direction of the bird's head

A few birds are NOT exactly southwest or southeast, but more south by southeast. This can be a learning opportunity to discuss accuracy, personal interpretation and standardizing units or methods of collecting data.
